

# kreate

## From Production to Delivery

Kreate and its leadership team have over a century of plastic injection molding know-how with market experience that includes consumer goods, agricultural products, appliances and high and low volume automotive.

### Core Focus

- Full-service, plastic injection molding contract manufacturing
- High-quality injection molded products

## Fully-Automated, Large Tonnage Injection Molding

We're setting the standard in plastic injection molding from 720 to 1,550 tons.

### Features and Benefits

- New all-electric machines provide greater accuracy, efficiency, quality and overall lower power consumption
- Integrated IQMS
- Robotics and full automation reduces manual input required for unloading of parts
- Increased envelope size allows for large parts
- Faster cycle times and cleaner and quieter operation
- Improved part quality and operating environment allow us to maintain the highest standards

## Invested in Quality

Kreate has invested in all-electric, servo-driven plastic injection molding machines and climate controlled facilities—making us one of the most efficient plastic parts manufacturers in the country. Kreate provides customers with the highest quality and most effective injection molded parts in the industry.

### Facility Information

- 60,000 sq. ft. facility
- Up to 200,000 sq. ft. of potential warehousing space
- Climate controlled

## Thermoplastic Materials

Kreate specializes in any and all materials ranging from:

- ABS
- Acetal
- Acrylic
- Nylons
- PBT
- PET
- PC/ABS blends
- Polypropylene
- Polyethylene
- Polycarbonate
- TPE
